**Attachments:** AMP501\_1813144-0.txt

Good morning Mike,

I double-checked our records and confirmed the Exceptional Event flags were loaded to AQS as "RJ" flags on 11/15/2019 (they previously had the informational "IJ" flag):

RD|U|48|141|0057|81102|01|7|001|062|20170425|00:00|188.0||6||RJ| || || || || || || || ||

RD|U|48|141|0057|81102|01|7|001|062|20180502|00:00|158.0||6||RJ| || || || || || || || ||

Just to be sure, I extracted the data directly from AQS just now, and the flags are there (see attached AQS data extract).

Please let me know if you need anything else.

Thank you,

Weslee Copeland  
Meteorologist, Technical/QA Coordinator  
Monitoring Division, Data Management Section  
Texas Commission on Environmental Quality

Hi Mike,

I included our Data Management folks on this reply, they are the ones that you need to work with to get AQS updated with the Exceptional Event information.

Let me know if you need anything else!

Thanks,  
Holly

Holly –

We recently sent TCEQ a response to an Exceptional Event Demonstration (upon which we concurred), and in trying to concur in AQS we do not see it. Can you check to see that it was entered properly or put me in touch with the person that does that, and I can give them the details. This was for PM10 at the Socorro monitor. Thanks.

Mike
